

Oliver's is excited to announce the arrival of **Mojo Kombucha**

"It makes sense putting living foods into our living bodies"

MOJO Organic Original

This is the base product and where it all began. The original has a very crisp taste, clean on the tongue with a refreshing zing.

MOJO Organic Original

The power of Ginger has been known to us for centuries. We have added Pressed Ginger Juice to our Kombucha giving the drink a whole new dimension both in flavour and health qualities.

MOJO Lemon Citrus

In this variety the freshness of squeezed lemon juice has been added which works fantastically with the bubbles of the Kombucha.

What is Kombucha?

Founded over 2000 years ago in China, Kombucha is an ancient hand - made drink that is created by a unique fermentation process. A living culture of Kombucha transforms the traditional ingredients to create a refreshing, effervescent, natural health elixir. It is said to assist in balancing the mind, body and the spirit....or you.

Why should I drink this?

Kombucha is a low in sugar (up to 3x less sugar than your average standard soft drink or juice) and we all know less sugar is best. It is organic, which means nothing artificial, it is as raw as we can give it to you. Mojo Kombucha is a living food that contains live yeast and bacteria. The bacteria are Lactobacillus bacterium that has been known to support a healthy digestive tract. The digestive system is described by many as the centre of our health, so a healthy digestive system, equals healthy body.
