

Absolute Organic, Certified Organic, Vegetable Chips

Do you ever stop to think, "By buying this product who am I supporting, where is my money going?"

At **Oliver's** we make a conscious decision about every product we sell to YOU.

We are aware that cheap things are seldom good and good things are seldom cheap.

Absolute organic is an Australian certified organic and biodynamic food company established in 1986. Absolute Organic believe in the importance of sustainability and biodiversity within our food industry. By purchasing Absolute Organic products YOU are supporting over 10 million hectares (and growing) of certified organic and biodynamic agriculture. Organic foods are grown free of synthetic chemicals, fertiliser's or genetically modified organisms; organic food is clean, fresh, wholesome and an environmentally friendly way of eating.

Absolute Organic chips are made from Organic potato, Organic sweet potato or Organic beetroot; they are cooked in Certified Organic vegetable oil and seasoned with sea salt. Sea salt is known for its many health benefits, due to its high mineral content, unlike traditional table salt, that is comprised of just sodium and chloride. Beetroot is a known super food, with many benefits noted because of tis high nutrient content, particularly for liver and cardiovascular health. Sweet potato is a great alternative the classic potato chip, because it is low GI choice.
